

PESTATAK

Welcome to the Unika!!

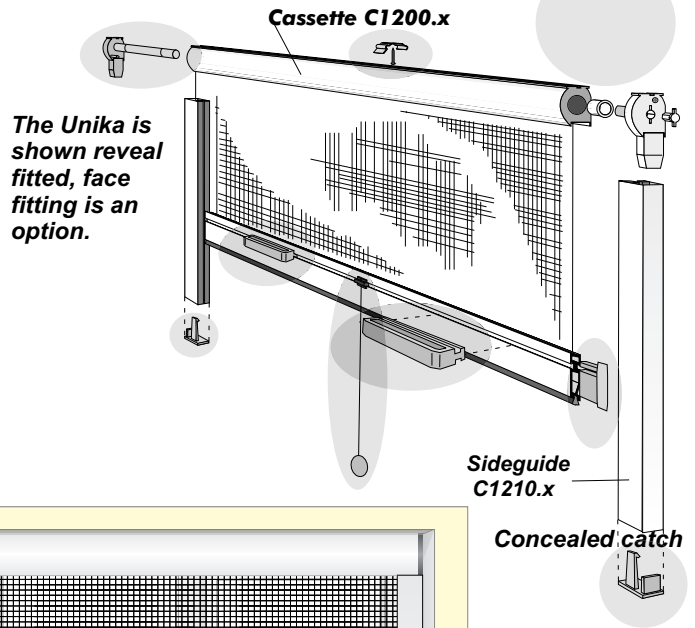

The Unika represents an extremely versatile and compact roller flyscreen system. Having a more compact cassette means it is as unobtrusive as possible.

Easy to size - Adjustment only requires trimming the side guides and cassette to size.

Easy to fit - Once cut to length, components slot and screw together. The whole blind is fitted simply, requiring only basic tools and DIY knowledge.

Spring assisted, made of durable powder coated aluminium profile, with rotproof PVC coated woven fibreglass mesh, the Unika represents a good quality, long lasting product.

Colour - Profile and fittings are white, with charcoal mesh.

The Unika is shown reveal fitted, face fixing is another option.
